

WINSTON SUMMERS

FULL STACK DEVELOPER

Seeking Jr position with opportunities to learn, grow and eventually advance. I've lead small teams and trained new hires; when times are tough, I am the one my bosses have come to to lead the charge. Coding is a passion of mine that has presented boundless challenges and excitement. Communication is the key to my method; a skill that I have refined on the job, working with clients and colleagues alike.

PROJECTS

Theater of the Mind(TotM)

Text-based RPG, a fun project to incorporate user inputs with logic and mechanics.

- Created a UI in HTML and CSS that looks the part and functions effectively
- Created game logic and interpreted user input with Javascript
- Manipulated the DOM and created an interactive experience with Javascript

Venture

App for travelers to record packing list and find places to eat.

- Working with a full MERN stack to present a clean looking app with dynamic features
- Use of the Yelp-Fusion API and node module to get results on the back end and give users more options
- Use of Auth and MongoDB so users can sign in and save data that they may want to retrieve later

Polr Bear

App for finding meetups and giving users ice breakers.

- Use of full MERN stack to create a cute semi-interactive UI
- Use of the Meetup API with axios to retrieve the meet ups and for the user to pick from
